

Stepping Stumps

Installation Instructions

NOTES: Please check for any damage caused by the shipping company and take appropriate steps to file a claim, if needed.

*Please call **Digsafe** and check for any underground utilities before digging anywhere.

Instructions

1. Check with local officials to determine if a “fall zone” is required.
2. Place in intended use area (fairly level surface recommended).
3. Typically set up to climb from lowest to highest. If spaced apart, they can be used as a balance walkway.
4. All wood is treated with a kid-friendly, water sealer with UV protectant preservative, but as is the case with all wood facing the elements, it needs to be cared for, so check it periodically for rough spots, splinters, etc, and sand them out.
5. Reseal stumps with a kid-friendly, water sealer with UV protectant wood preservative (we have it available if you can't find it) once or twice a year to keep the wood from deteriorating, or let the natural decaying process occur and teach the kids what happens to organic material after harvesting.
6. Enjoy your Stepping Stumps!
