SSC-CT30

Shipping Weight: 45 lbs
Shipping Dimensions: 30"L X 30"W X 6"H
Brand: Natural Playgrounds Company
Toxicity: child friendly wood preservative
Age Appropriateness: 3-10 years

Our Collection Tables can be used for just about anything.

We've put them in the middle of gardens, so they become places for flowers, or pebbles, or insects, or handfulls of dirt; in sand play areas so children can build sand structures on them, or collect colored sand particles. We've put them in the woods so they become repositories for cones, leaves, twigs, or insects, and we've put them near benches so they can be used for games, such as chess, checkers, mancala, cards, or just about anything else. And we've also put them in art areas so that children can use them for painting or crafts tables.

These highly versatile tables can be ordered in almost any size. Typical are about 2' in diameter, but 30" ones are very popular, as well. They come with a 6' long post which means they can be mounted at any height so they can be reached while standing, kneeling, or sitting.

These are great to have scattered throughout your Natural Playground, and because they are so reasonably priced, you can order several ones of different sizes and heights. Just let us know.

Tables are made from kid-friendly, pressure-treated lumber with attractive cedar edging. As with all wood products, some shrinkage, checking, and cracking may appear as the wood dries out. This will not affect the structural integrity of the product, but does provide an excellent learning opportunity for the children. You can help them understand what happens to wood after it is no longer being fed by the tree that grew it.

Instructions included. Simple assembly required; easy to put in place.
