Arched Bridges (no rails)

BF-AB-2x4

Shipping Weight: 53 lbs
Shipping Dimensions: 48"L X 25"W X 7"H
Brand: Natural Playgrounds Company
Toxicity: treated with child friendly wood preservative
Age Appropriateness: all ages

There are lots of things you can do along a pathway to make it interesting.

The Low Arched Bridge can span dry creek beds, wet streams, sand moats, rock beds, or mosaic rivers, and are a neat way to break up a path, provide a different sense of place, create a landmark, create a different sound, and so on.

Also great for dramatic play, like Billy Goat Gruff, friendly monsters under the bridge, etc :) When kids stomp on the bridge, it makes a nice hollow sound.

Shown here is our simple, 2’ x 4' low-arched bridge with a top deck of child-friendly treated lumber.

If you need a custom designed bridge for a particular application, we'll work with you to give you what you want. Bridges can have rails on both sides (see the other listing).

The bridge itself comes pre-assembled, ready for use out of the box (unless they’re super long, in which case it will be easy to assemble!
