Vertical Wall Climb

MRCF-VWC

Shipping Weight: lbs
Shipping Dimensions: "L X "W X "H
Brand: Natural
Toxicity: child friendly wood preservative
Age Appropriateness: all ages

The Vertical Wall Climb was inspired by the urban French sport called Parkour. A Parkour player will run up a building's vertical wall, grab the top of the parapet, and pull themselves up and over the edge.

Same thing with this wall. Run up to it, throw your body weight forward as you plant your first foot, let your momentum help you take another step or two up the wall, and grab for the top. On dry land it's a challenge. In a mud pit? That's another story. And it's pretty funny to watch :)

Price is for 1-6' high x 8' wide. An"A frame" supports the wall for above ground installation.

We've made these for elementary schools, high schools, and adult fitness courses as well as for several mud runs. Notice the first picture is for elementary school children, while the other pictures are from an adult challenge/mud run.

Comes as a kit that can be installed permanently, or it can be made so it is a movable item. Complete installation instructions are included either way.

NOTE: that if you purchase the portable/movable version of this wall, it MUST BE LOCATED ON LEVEL GROUND!!

For schools and public playgrounds, a fall zone would be required.

FREE SHIPPING ON THIS ITEM within the continental US.
