Musical Wood (Xylophone) - SALE w/

NMS-MWX -S

Shipping Weight: 40 lbs

Shipping Dimensions: 72.00"L X 4"W X 8"H

Brand: Natural Playgrounds Company

Toxicity: child friendly wood preservative

Age Appropriateness: all ages

This Musical Wood instrument is based on the xylophone, an instrument that dates back to 2000 BC in China, or possibly earlier. More recent, is a tuned log xylophone from Uganda, Africa called an amadinda.

We are fascinated by the fact that pieces of wood can produce notes, and your kids will be, too!

That's why we're offering a 10% discount on this item!! We want them to experience this simple instrument.

We purposely don't "tune" the wood, as the whole idea is to help children understand that almost anything can make sounds, and that almost any sound can be heard as musical. If they want to "play" a tune, then they have to "discover" the right sounds that make that tune possible (all part of the discovery-oriented play and learning experience)!

Musical Wood Xylophone is meant to be suspended between two posts, but may easily be hung from a tree branch or tree stand, but this is where we issue a caution: the xylophone is NOT meant to be sat on!!! Excessive weight on top of the xylophone, such as children leaning on it, or sitting on it, will pull the fasteners out of the post, damage for which we cannot be held responsible.

Douglas fir is treated with kid-friendly preservative to extend the outdoor life of the wood.

Comes with two posts, two small mallets, all hanging hardware, and easy installation instructions.

Installed size 5'-8 1/2" x x 2'-0" x 2'-2" high. Standard height installation average playing surface 18".
