Log & Beam Treatment (1 Gallon)

PM-LBT

Shipping Weight: 12.00 lbs

Shipping Dimensions: 8.00"L X 6.00"W X 14.00"H

Brand: Preservation Solution

Toxicity:

Age Appropriateness:

We tried several wood sealers but found that they didn't hold up over time, so after lots of research, we settled on Preservation Solutions' Log & Beam Treatment.

It's specially formulated to slow the drying of logs, beams, and timbers, and can be used on hand-hewn, milled, and hand peeled logs and timbers.

Wood can be treated and dried outside or inside. Great for use on logs, stumps, sluiceways, columns, railings, stairs, etc.

Benefits

- Can be used on green (wet) or dry wood
- Will not darken the wood
- Enhances the natural color and grain of the wood
- Does not form a film
- Will penetrate deep into the wood
- Water-based or oil-based stains and dyes can be added to Log & Beam Treatment or applied after using Log & Beam Treatment
- Contains a UV protectant
- Non-toxic and non-hazardous
- The Log & Beam Treatment is easy to apply and cleans up with soap and water.
- Environmentally friendly
- Can be sprayed on all wood using an inexpensive garden pump sprayer

Approximate coverage 200 sq. ft./gal

We recommend treating all Natural Playground wood elements at least twice, but preferably three times each year (spring, summer, and fall), especially in harsh climates.
