Demonstration Tables

DEM-TABLE

Shipping Weight: 185 lbs
Shipping Dimensions: 96"L X 28"W X 10"H
Brand: Natural Playgrounds Company
Toxicity: child friendly wood preservative
Age Appropriateness: all ages

Demonstration/Work Tables are an excellent Natural Playground element for outdoor classroom, because they can be used for demonstrations to show children different concepts, materials, experiments, and so on, and kids can use them for building models, collecting things, or etc.

The standard height of the table is 33” to accommodate adults “in front of the class,” but the height can be easily adjusted if you want kids to be able to stand behind and use it. Just let us know the age group who will be using it (or you can cut the legs once you get it on site).

We offer both an 8’ long x 27” wide one, and a 48”x48” one that a number of children can be around at any one time, and that are light enough that they can be easily moved to wherever you need them.

These are also great for an outdoor classroom, and can easily be installed in front of sitting stumps or slab or other benches spaced 6 safe feet apart.

NOTE: this image shows the long Demo Table with a sink and gooseneck faucet, which are obviously options, but they DO NOT come with the basic table.

These tables are so inexpensive that you can easily buy several to make a real working outdoor classroom where lots of experiential learning can take place.

If you want kids to be able to sit, get some of our sitting stumps to go along with the table! (see elsewhere in this store).

We can also make these tables accessible with a 27” clearance under them. Just let us know!
